PROFESSIONAL PROFILE

Technology professional with experience spanning IT support, software development, quality assurance, and technology consulting. Founder of Vallejo Tech, where I provide managed IT services, technical consulting, and custom web development solutions for residential clients and small businesses. Experienced in diagnosing complex hardware and software issues, designing, developing, and deploying cloud-hosted web applications, and delivering reliable technology solutions that improve business operations.

Previously served as an Associate Software Engineer supporting Wells Fargo's Zelle platform through enterprise software quality assurance, contributing to automated testing, regression testing, defect analysis, and Agile software development. Recognized for combining strong technical problem-solving abilities with excellent customer service, clear communication, and a commitment to continuous learning.

Passionate about building practical software, improving technology workflows, and helping individuals and organizations leverage technology more effectively through dependable, well-designed technical solutions.

SPECIALTIES

IT Support • Software Development • Quality Assurance • Technical Troubleshooting • Customer Success

PROFESSIONAL HIGHLIGHTS

- Founded and operate Vallejo Tech, providing IT support, web development, networking, and technology consulting services throughout Northern California.
- Built and deployed production web applications utilizing React, Firebase, Firestore, Cloudflare, Cloudflare Workers, Cloudflare R2, and modern JavaScript technologies.
- Enterprise software quality assurance experience supporting Wells Fargo's Zelle platform using Selenium, TestNG, Cucumber, Jira, and Agile methodologies.
- Extensive experience troubleshooting computer hardware, operating systems, networking, printers, wireless infrastructure, Microsoft 365 environments, and end-user technology.
- Designed and implemented secure cloud-hosted applications featuring authentication, cloud databases, file storage, appointment management, and e-commerce functionality.
- U.S. Army veteran with extensive experience following technical procedures, maintaining mission-critical equipment, and operating within structured, high-accountability environments.

CORE COMPETENCIES

Information Technology

- IT Support
- Desktop Support
- Technical Troubleshooting
- Windows Administration
- macOS Support
- Hardware Diagnostics
- Software Installation
- Remote Support
- Microsoft 365
- Email Configuration
- Printer & Scanner Support
- Network Configuration
- Customer Support

Quality Assurance

- Manual Testing
- Automated Testing
- Selenium
- TestNG
- Cucumber
- Regression Testing
- Functional Testing
- Defect Tracking
- Jira
- Root Cause Analysis
- Agile Development

Software Development

- JavaScript
- TypeScript
- React
- Node.js
- Express
- REST APIs
- HTML5
- CSS3
- Responsive Design
- Firebase
- Firestore
- SQLite
- MongoDB
- Authentication
- Git
- GitHub

Cloud Technologies

- Cloudflare Pages
- Cloudflare Workers
- Cloudflare R2
- Firebase Authentication
- Firestore Database
- Cloud Deployment
- API Integration

Networking

- TCP/IP
- DNS
- DHCP
- Wi-Fi Configuration
- Router Configuration
- Network Troubleshooting
- Internet Connectivity
- Remote Administration

TECHNICAL PROFICIENCIES

Programming Languages

JavaScript • TypeScript • C# • C++ • Java • SQL

Frontend

React • HTML5 • CSS3 • Responsive Design

Backend

Node.js • Express.js • REST APIs

Databases

Firebase Firestore • SQLite • MongoDB

Cloud Platforms

Cloudflare • Firebase • Cloudflare Workers • Cloudflare R2

Testing & Quality Assurance

Selenium • TestNG • Cucumber • Jira • Agile • Regression Testing • Functional Testing

Operating Systems

Windows • macOS

Development Tools

Git • GitHub • Visual Studio Code • Firebase Console • Cloudflare Dashboard

PROFESSIONAL EXPERIENCE

Vallejo Tech

Founder | IT Support & Web Developer
February 2026 – Present | Vallejo, California

Founded and operate an independent technology consulting business providing IT support, technical consulting, and custom web development services for residential customers and small businesses. Manage every aspect of business operations including client relationships, technical support, software development, infrastructure management, deployment, and ongoing maintenance.

Key Responsibilities & Achievements

- Provide onsite and remote technical support for Windows and macOS systems, diagnosing and resolving hardware, software, networking, and connectivity issues.
- Install, configure, and troubleshoot desktop computers, laptops, printers, scanners, wireless networks, routers, and Microsoft 365 environments.
- Design, develop, deploy, and maintain responsive websites using React, JavaScript, HTML5, CSS3, Firebase, Firestore, and Cloudflare technologies.
- Build secure authentication systems, cloud-hosted databases, appointment scheduling platforms, and e-commerce functionality tailored to client requirements.
- Configure remote support solutions enabling efficient troubleshooting and technical assistance for clients across multiple locations.
- Plan and execute complete technology upgrades including hardware installations, operating system deployments, software migrations, and backup solutions.
- Manage cloud infrastructure using Cloudflare Pages, Cloudflare Workers, Firebase Authentication, Firestore, and Cloudflare R2 storage services.
- Deliver personalized technology consulting, educating clients on best practices while improving operational efficiency through modern technology solutions.
- Maintain long-term client relationships by providing reliable support, proactive maintenance, and ongoing technical guidance.

MPHASIS

Associate Software Engineer (Quality Assurance)

June 2021 – February 2023

Supported enterprise software quality assurance initiatives for Wells Fargo's Zelle platform, working within an Agile development environment to ensure the reliability, stability, and functionality of customer-facing financial applications. Collaborated closely with developers, business analysts, and fellow QA engineers to identify defects, validate software enhancements, and maintain high-quality software releases.

Key Responsibilities & Achievements

- Executed functional, regression, smoke, integration, end-to-end, and user acceptance testing for enterprise banking applications supporting millions of customers.
- Developed, maintained, and executed automated test scripts utilizing Selenium WebDriver, TestNG, and Cucumber to improve testing efficiency and reduce manual testing effort.
- Identified, documented, and tracked software defects using Jira while collaborating closely with development teams to verify fixes and ensure successful resolution.
- Participated in Agile ceremonies including sprint planning, backlog refinement, daily stand-ups, sprint reviews, and retrospectives.
- Validated new software features, enhancements, production fixes, and releases against business and technical requirements.
- Performed cross-browser and cross-platform testing to verify application functionality across multiple environments.
- Reproduced reported software defects, analyzed test results, and collaborated with developers to determine root causes.
- Assisted in maintaining reusable automated testing frameworks that improved regression testing consistency across software releases.
- Contributed to improving software quality by identifying edge cases, usability concerns, and opportunities to strengthen test coverage.
- Worked within a highly regulated financial environment where accuracy, documentation, security, and attention to detail were critical to successful software delivery.

AT&T

Wireless Specialist | Interim Assistant Manager November 2017 – August 2018

Provided technical support and customer service for mobile devices, wireless services, and consumer technology while assisting with day-to-day retail operations. Frequently served as Interim Assistant Manager, supporting store leadership, coaching employees, and helping maintain operational performance.

Key Responsibilities & Achievements

- Diagnosed and resolved customer issues involving smartphones, tablets, mobile operating systems, wireless connectivity, and account services.
- Assisted customers with device setup, software troubleshooting, data transfers, warranty support, and technical education.
- Built strong customer relationships through effective communication, problem-solving, and personalized technology recommendations.
- Supported daily store operations including opening and closing procedures, inventory management, scheduling assistance, and team coordination.
- Coached and mentored new employees on sales techniques, customer service, and technical troubleshooting procedures.
- Assisted store leadership in achieving operational goals while maintaining a high standard of customer satisfaction.
- Developed the ability to explain complex technical concepts to customers with varying levels of technical experience.
- Recognized as a dependable team member capable of balancing technical support responsibilities with leadership duties.

WESTAMERICA BANK

Fraud Specialist

January 2019 – March 2019

Investigated potentially fraudulent banking activity while protecting customer accounts and minimizing financial risk. Worked within established regulatory and compliance guidelines to review transactions, verify account activity, and communicate effectively with customers regarding sensitive financial matters.

Key Responsibilities & Achievements

- Reviewed account activity to identify suspicious transactions and potential fraudulent behavior.
- Investigated fraud cases by analyzing transaction history, customer information, and supporting documentation.
- Communicated directly with customers to verify account activity while providing professional and empathetic customer service.
- Maintained detailed documentation supporting investigations and regulatory compliance requirements.
- Collaborated with internal departments to resolve fraud-related issues efficiently while minimizing customer impact.
- Demonstrated strong analytical thinking, confidentiality, and attention to detail in a highly regulated financial environment.
- Assisted in protecting customer assets while ensuring compliance with banking policies and fraud prevention procedures.

UNITED STATES ARMY

Armament Repair Specialist

2009 – 2012 | Honorable Discharge

Served as an Armament Repair Specialist responsible for the inspection, maintenance, repair, and operational readiness of military weapon systems and associated equipment. Worked within strict technical standards and maintenance procedures while supporting mission readiness and unit operations.

Key Responsibilities & Achievements

- Performed preventive maintenance, inspections, diagnostics, and repairs on military armament systems and associated equipment.
- Utilized technical manuals and standardized military procedures to ensure repairs met quality and safety standards.
- Conducted troubleshooting to identify mechanical failures and restore equipment to operational readiness.
- Maintained detailed maintenance records supporting accountability, inventory management, and equipment lifecycle documentation.
- Worked effectively within high-pressure environments where precision, teamwork, accountability, and reliability were essential.
- Developed strong discipline, problem-solving abilities, and attention to detail through military technical training and operational experience.
- Supported mission readiness by ensuring assigned equipment remained operational and maintained to military specifications.

EDUCATION

Full Sail University

Associate of Science — Computer Science
Graduated: November 2025

Relevant Coursework:

- Software Engineering
 - Object-Oriented Programming
 - Database Systems
 - Web Development
 - Data Structures & Algorithms
 - Software Testing
 - Mobile Development
 - Cloud Computing
 - Information Security
-

Coding Dojo

Certificate — Full Stack Web Development (MEAN Stack)

Focused on full-stack application development utilizing MongoDB, Express.js, Angular, and Node.js while strengthening object-oriented programming concepts, RESTful APIs, database design, and modern software development practices.

Academy of Art University

Game Development Coursework

Completed coursework focused on programming fundamentals, C++, C#, Unity development, game design principles, object-oriented programming, and software development methodologies.

SELECTED SOFTWARE & TECHNICAL PROJECTS

VallejoTech.org

Business Website & Client Management Platform

Designed, developed, and deployed the official website for Vallejo Tech using React, Firebase, Firestore, and Cloudflare. The platform serves as both a business website and client management solution featuring secure authentication, appointment requests, contact management, cloud hosting, and responsive design.

Technologies: React • JavaScript • Firebase • Firestore • Cloudflare Pages • Cloudflare Workers • Cloudflare R2

SoulfulCustoms.shop

Custom E-Commerce Platform

Developed a fully responsive e-commerce website supporting product catalogs, shopping cart functionality, image uploads, cloud storage, secure order management, and modern responsive design. Integrated Firebase services with Cloudflare infrastructure to deliver a scalable production-ready platform.

Technologies: React • JavaScript • Firebase • Firestore • Cloudflare Workers • Cloudflare R2 • HTML5 • CSS3

WLMeta

Warcraft Logs Analytics Platform

Developing a full-stack analytics application that integrates with the Warcraft Logs GraphQL API to collect, process, and analyze gameplay data. The project includes OAuth authentication, API integrations, data processing, SQLite storage, and a React-based dashboard for visualizing player and encounter statistics.

Technologies: React • Node.js • Express • GraphQL • OAuth • SQLite • REST APIs

Crimson Dusk

Independent Game Development Project

Designed and developed an original game prototype utilizing Unity and C#. The project strengthened object-oriented programming skills while reinforcing gameplay systems, software architecture, debugging, and iterative development practices.

Technologies: Unity • C# • Git • Object-Oriented Programming

TECHNICAL STRENGTHS

- Strong foundation in information technology, software development, and enterprise quality assurance.
 - Experienced troubleshooting complex hardware, software, networking, and cloud-based technology environments.
 - Passionate about building practical software solutions that solve real-world business problems.
 - Comfortable learning new technologies independently and adapting quickly to unfamiliar technical environments.
 - Experienced deploying modern web applications utilizing cloud infrastructure and contemporary development practices.
 - Strong analytical mindset with an emphasis on identifying root causes, improving workflows, and delivering dependable technical solutions.
 - Dedicated to continuous professional growth through hands-on development, self-directed learning, and real-world client experience.
-

LANGUAGES

- English (Native)
- Spanish (Professional Working Proficiency)

PROFESSIONAL PHILOSOPHY

I believe great technology should simplify people's lives—not complicate them. Whether troubleshooting technical issues, developing software, supporting enterprise applications, or helping small businesses modernize their technology, I approach every challenge with curiosity, professionalism, and a commitment to delivering dependable solutions. My goal is to continue growing as an IT professional while building software and technology that creates meaningful value for both organizations and the people they serve.
